The Chemistry Section is organizing a mentorship program for young female researchers, scheduled to start in the fall of 2021!

In this new initiative we will strive to connect researchers across all steps of the academic career ladder, as well as across the academia/industry divide.

With SURFACE, our younger researchers will get a sense of their possible futures within and outside academia, and be given the instruments and knowledge to find their place within the world of science.

For more information, or to sign up for the program, e-mail us at: surfacefc@su.se
